## DETAILED ACTION

**This application has been transferred to Primary Examiner, Kim M. Lewis.**

### *Response to Amendment*

The amendment filed 4/2/10 has been received and made of record. As requested, claim 19 has been amended.

Claims 19, 20, 22-25 and 27-36 are pending in the instant application.

### *Oath/Declaration*

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:  
It does not state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be "material to patentability as defined in 37 CFR 1.56."

The oath or declaration instead states "**material to examination**".

### *Drawings*

2. Figures 1-5 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled

Art Unit: 3772

"Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

4. The abstract of the disclosure is objected to because it includes the term "said".

Correction is required. See MPEP § 608.01(b).

5. The disclosure is objected to because of the following informalities:

Page 7, line 28, after "lower" insert --leg--.

Page 12, "Velco<sup>®</sup>" should read --Velcro<sup>®</sup>--.

Appropriate correction is required.

***Allowable Subject Matter***

6. Claims 19, 20, 22-25 and 27-36 are allowed.
